My blog is a website with short self-teach lessons you can do at home, or anywhere with Internet access. You don’t need a special user name or password. There are also some games to help you brush up your mental arithmetic, especially times tables. Have a look.

- Go to **Internet Explorer**.
- Search for **www.timsclasses.wordpress.com**
  Use the address bar at the **top** of the screen.
- You will see a screen like this...

- **Click** **Tim’s Functional Maths Classes (E1, E2, E3)**
  or **Tim’s Functional Maths Classes (L1, L2)**.

- You will see a screen like this...
Find the topic and level you want to practise: eg **Fractions, Decimals & Percentages – Level1**. Click the item you want: eg **Fractions – MOHT L1**.

This will take you into a new window. Work through each screen in turn, and click the **move on** button at the bottom when you are ready.
